

PROFESSIONAL SUMMARY

1.3 Years as Data Engineer at ITC Infotech From Aug 2024 to till date

Data Engineer with 1.3+ years of experience in Data Engineering, Big Data technologies and Data Analysis, . Proficient in Python, PySpark,AWS,AWS Glue,Lambda,Stepfunction,s3,blob storage,AWS SNS,SQS,SES,Redshift,Snowflake,,Data Validation,Data Migration,Data Modeling,Databricks SQL,Hadoop,Data Mideling, Hive , Azure Cloud with expertise in building and managing scalable data pipelines using Azure Data Factory. Skilled in Data Mining, Data Preparation, Data modeling and ETL processes, ensuring high-quality data flow for analytical and business needs. Experienced in handling large datasets, implementing Machine Learning algorithms, and working with cloud platforms for data storage and processing. Strong knowledge of Proof of Concepts (PoC) and gap analysis to drive data-driven solutions for enterprise applications.

EDUCATION

2022 - 2025

b.pharmacy

savitribai phule pune university / India, Pune

SKILLS

- SQL Expert
- Python Expert
- ETL Expert
- Apache Spark Expert
- AWS cloud Expert
- pandas Expert
- NoSQL Expert
- Big Data Expert
- Data Warehousing Expert
- Data Mining Expert
- Apache Hadoop Expert
- Data Modeling Expert
- Cloud Computing Expert
- Data Visualization Expert

HOBBIES

- Cooking
- Drawing
- Reading

LANGUAGES

- English
- Hindi

EXPERIENCE

2024 - Now

Data Engineer

Global Pharma / United States

Project Name:

EUAU Healthcare Data Pipeline – Region Bifurcation

Technical Skills: Python,SQL,PySpark,ETL,Pandas,AWS (S3, Lambda, EMR, Glue, SNS, CloudWatch, Redshift),Git,Excel

Project Overview:

The project involved building a **region-wise automated data pipeline** for Australia (AU) and Europe (EU) to process large volumes of pharmaceutical sales and CRM data coming from multiple sources such as **Salesforce, APIs, and SFTP**.

Data was ingested into S3, validated through Lambda, orchestrated using Step Functions, transformed using EMR/Glue, and finally loaded into **Amazon Redshift** for analytics. The solution standardized inconsistent data formats, improved data quality, and generated accurate insights to support regional sales planning and decision-making.

Outcomes:

- 90% reduction in manual data handling and error correction
- Faster SLA-bound reporting due to parallel processing for each region
- Improved compliance through fully automated validation and logging
- Enhanced decision-making with faster and cleaner market insights
- Scalable design enabling onboarding of more regions in the future

Roles and Responsibilities:

- Developed and executed **data validation scripts** for completeness and business rule checks
- Performed **data cleaning, deduplication, and transformations** using PySpark
- Managed **file format validation** and schema checks across AU and EU sources

- Marathi

PERSONAL INFO

- Date of birth: 12 October 2003
- Place of birth-
: Narayangaon,Maharashtra.
- Nationality: indian

- Logged and reported validation outcomes for process monitoring
 - Designed and maintained **ETL jobs** using Lambda, Glue, and EMR
 - Handled error management with **error buckets, SNS alerts, and region-specific notifications**
-
